Quality Assessment

February 18, 2008

Description of item:

One 14k yellow gold ladies three stone ring with princess cut diamonds. The center stone is approx. 0.58 ct (weight estimation by formula), has a clarity of I-1, G color and good symmetry. The side diamonds are approx. 0.51 ct and 0.43 ct, average SI₁ & I₁ clarity, G color and have very good symmetry. The mounting is 14K (stamped) yellow gold with the stones mounted in platinum heads. Total diamond weight is approx. 1.52 ct.

Condition: Very Good

Mitchell Dustin, G.G. (GIA), NAJA, ICGA

This is not an insurance or estate appraisal. This is a certification of authenticity and is a reflection of retail value at the time the item was viewed by the independent appraiser using Gemological Institute of America (GIA) grading standards. The value assessed is a reflection of what the item would sell as new and its current condition is a factor in the value assessed. This document is not for insurance purposes nor is it proof of ownership.
